

SIDAT HYDER

**Information Solutions for
Engineering, Construction,
& Operations (EC&O)**

October 2006

www.SidatHyder.com.pk

Engineering, Constructions, and Operations (EC&O) companies are project driven, with an increased emphasis on visibility and flexibility. Visibility to see projects holistically and immediately, thereby identifying required and available resources. Flexibility to manage mid-project variations in a way that fully accounts for consequent effects to schedules and budgets.

EMERGING TECHNOLOGY AND TRENDS

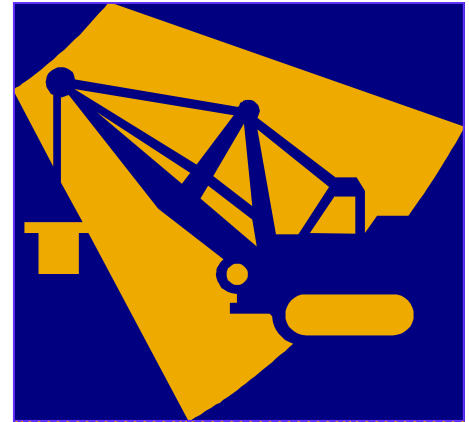

In the years ahead, companies in the engineering, construction, and operations industries will be fully integrated, leading to new levels of efficiency.

The enterprise will become increasingly mobile, and companies will be able to provide workers with anywhere, anytime access to vital enterprise resources that were previously inaccessible from remote locations.

PROJECT-EXECUTION CAPABILITIES

Effective task execution impacts project profitability. That's why companies seek better ways to handle resources, execute project logistics, manage documents, and interact with strategic partners. Other priorities are detailed warehouse management, On-site and off-site shipment tracking and ongoing quality management.

Companies should use sophisticated project management systems that can move and track direct materials both on-site and off-site. They should seek highly integrated solutions in which new project requirements can automatically trigger follow-on processes such as generating purchase orders.

Contract Management

- Project Time-Cost Analysis
- Tender Inquires
- Item Coding system
- Secure Advance provision
- Planning for staff and labor
- Calling Accessories
- Project Tools
- BOQ Recording
- Rate Analysis
- Overhead Calculation
- Control Budget Generation
- Project Reconciliation
- And more.....

MANAGE PROJECTS ON TIME AND ON BUDGET

Successful projects start with accurate planning, budgeting, estimating, and scheduling to minimize risk. Companies must be able to aggregate information and collaborate to increase bidding productivity.

For the execution phase, companies want increased visibility to monitor and analyze available resources, project progress, and earned value.

Companies also need a single project view that combines logistical and financial perspectives as well as the ability to manage mid project variations and their impact on budgets and schedules.

Knowing exactly where each project stands, management can allocate material, financial resources, and human resources in the most cost-effective manner.

Sidat Hyder - Information Solutions also contains the following modules:

- General Ledger
- Fixed Asset
- Supply Chain Management
- Procurement (Purchases)
- Inventory Management
- Tenders (Sales Module)
- Human Capital Management
- Payroll
- Human Resource

SIDAT HYDER

Project Management

- Cross Project Reporting
- Manage Documents
- Warehouse management
- Multiple Projects management
- Store System
