- MRP
- Accounts/Finance
- Receivables /Payables
- Payroll
- Fixed Assets

Epla Laboratories (Pvt.) Ltd is one of Pakistan's leading national pharmaceutical companies, manufacturing, marketing and exporting a wide range of human and animal health products. Since 1952, Epla has predominantly focused on cre-

ating an environment conducive for producing and selling quality pharmaceutical products ethically within the country and abroad.

Epla is one of the only two pharmaceutical companies in Pakistan to have received the Presi-

dential Award for Good Manufacturing Practices. It is also among a very select group of pharmaceutical companies to be ISO-9001:2000 certified, showing its focus on quality.

BUSINESS NEED

EPLA Laboratories has been pursuing a growth strategy to maintain and enhance its market share in the extremely competitive Pakistani marketplace. A multifaceted approach was needed to address the situation. Aggressive marketing strategy was required on the external side, while efficient and effective controls and management decision making was required internally at the other end.

To respond to the challenge, desired growth levels, intense regulatory requirements and management demands to quickly make appropriate, strategic business decisions, EPLA Laboratories needed an enterprise wide integrated system in place.

The company needed many of the typical modules offered by leading ERP systems, such as general ledger, accounts payable / receivables, purchasing and imports, work order management, inventory management, resource planning, requirements planning and more. It sought an ERP system that was built on leading-edge architecture to provide high scalability and support for a resilient accounting system and also affordable and cost effective to maintain.

SOLUTION: SIDAT HYDER-FINANCIALS, SCM, HCM

Sidat Hyder - Information Solutions was selected to fulfill the needs. Working in a joint team Sidat Hyder Implementation Support consultants helped deploy this scalable, Enterprise Application solution covering Financials, Human Capital Management, Supply Chain Management and Production operations.

A comprehensive Gap Analysis phase was undertaken and the applications were tailored to fit the requirements and address the business needs for EPLA. Considerable time and cost savings

are experienced on account system generated document printing and online approval cycles. Besides reporting on inventory is now in more control and the organization saves on stock out costs and over productions.

This is a very cost effective solution as Sidat Hyder – FINANCIALS serves as the financial bone and the SCM is geared to support the Pharmaceutical best practices prevalent in the industry. Additionally all local statutory reporting requirements are also fulfilled.

The company has considerably reduced the time required to compile month end reports and has also improved upon its internal control procedures, thereby helping the management in better and informed decision making.

The solution has empowered the managed to do more in less time and using the same resource pool.
