

DEPUTY MANAGER (PETROLEUM ENGINEERING)

1. JOB DETAILS:

Position Title:	Deputy Manager (Petroleum Engineering)
------------------------	---

2. JOB OBJECTIVE:

Implementation/Delivery of the business targets in GHPL's exploration & development portfolio and new ventures in petroleum engineering discipline.

3. KEY ACCOUNTABILITIES:

- Provide support to Petroleum engineering Manager/DGM/GM for the following:
 - Daily monitoring of Production Operations and weekly reporting for all assigned D&PLs and EWT.
 - Yearly/Long Term Production budget preparation for all development assets. Biweekly and Monthly actual production review w.r.t. forecasted production.
 - Evaluate the applicability of techniques and equipment to be used in production testing to ensure the high quality of the data gathered in oil/gas/condensate fields.
 - Monitor wells/reservoir behavior during production and shut-in to ensure a cost effective production strategy.
 - Monitoring/delivery of the approved projects within time/budget without compromising on HSE.
 - Proposing techniques and the equipment to be used for ensuring production optimization/enhancement by cross discipline integration in oil/gas/condensate fields in a cost effective manner.
 - Analyze the drilling and operation plans to propose optimum testing and completion design.
 - Liaison with exploration and reservoir teams for evaluation of reserves and economic analysis of prospects/EWTs/producing fields.
 - Review new technologies for improving well design to maximize field optimum recovery for oil/gas/condensate fields.
 - Optimize completion and work-over programs and requirements to maximize production ensuring technical quality and cost effectiveness of the solution adopted.
 - Assess and advise for approval of well intervention jobs, design of completion, acid stimulation, perforation and logging, Production testing and Extended Well Testing (rig and rigless work overs).
 - Analyze production data to verify compliance with forecast and to propose the necessary action in order to ensure delivery of the agreed production targets.
 - Participate in Technical and Operating Committee Meetings of different Joint Ventures for review of work programs, operations and their related budgets.
 - Review/analysis of relevant AFE's & Contracts in a timely manner.
 - Any another job assigned by the management.

4. QUALIFICATION & EXPERIENCE:

Minimum Qualifications:

- 16 years of Education with Bachelor's or Master's degree in Petroleum Engineering

Minimum Experience:

- 06 years of experience with 04 years in Petroleum engineering operations (Production and workovers (oil, gas or condensate)) operations in an upstream E&P operated company

5. COMPETENCIES:

- Sound Technical background
- Hands on experience with Avocet/OFM, Kappa, Prosper etc.
- Excellent communication & presentation skills
- Sound understanding of E&P business including PCA
- Cross discipline integration with other disciplines like reservoir engineering, production, geology etc.
- Ability to deliver under tight timelines
- Team Player

6. AGE LIMIT:

- 40 Years

7. GENERAL INFORMATION:

- The position is based in Islamabad.
- We are an Equal Opportunity Employer. Women, Transgender persons and candidates belonging to minorities are encouraged to apply.
